

List of review editors

These review editors served as independent “referees” to oversee the process that incorporated comments from scientific and stakeholder reviewers, ensuring that every review comment was considered by the lead authors and received appropriate attention and a response from the assessment team. Chapter Review Editors provided feedback for a specific chapter(s) while the Review Editor provided oversight for the whole assessment.

Review Editor:

Alan Townsend, University of Colorado

Chapter Review Editors:

Chapter 1: Introducing the California Nitrogen Assessment - Neville Ash, United Nations Environment Program

Chapter 2: Underlying drivers of nitrogen flows in California - Eric Lambin, Stanford University

Chapter 3: Direct drivers of California’s nitrogen cycle - Eric Lambin, Stanford University
